

**PAR-KY**<sup>®</sup>  
THE NATURAL WOOD FLOOR

## PURE WOODEN FLOORS IN YOUR FUTURE PROJECT

Wood is beautiful, natural and warm.  
Thanks to the veneering technology, **wood becomes hi-tec**.  
We only take from nature the most beautiful wood  
and adapt it to your needs.  
And we will not limit ourselves to **your creativity**.

PAR-KY brings you the wood floor of the future,  
and this for any home interior.

PAR-KY has a wood veneer experience since 1979, positioning  
itself as the best player in the world for answering your  
questions on wooden flooring. We know what we are talking  
about. We have the answer for your wooden floor project.

- **Wood adds value to your project**
- **Hi tec wood lowers installation costs**
- **Hi tec wood lowers maintenance costs**
- **Wood is the best solution for a healthy home**

Our floors are pre-finished, engineered hardwood floors that  
deliver enduring beauty and exceptional value. There's no  
better investment than hardwood that you can make!  
PAR-KY uses only the most beautiful wood as we have the first  
choice over all the other wood buyers. Moreover, veneering  
technology is not harming nature. A rational use of wood  
guarantees a wooden future.

PAR-KY's maintenance is quick and easy.  
Moreover, wood veneered flooring is anti static and anti  
allergies.

PAR-KY stands for durable quality with a **15 year warranty**.

## **A workforce dedicated for your project**

At PAR-KY we aim to service our customers. Our engineers and sales people are dedicated to offer you the best floor for your project. We give you an option, adapting our veneer floors to your needs. Options to choose from:

- Thickness of the panel
- Water resistant or fire retardant panels
- ZF or E1 panel boards, low or zero formaldehyde emission
- FSC or PEFC panels, respecting nature
- FSC or PEFC wood veneer
- Look for the most suitable and most beautiful wood veneers which match your creativity (unlimited wood choice)
- Brushing (only possible when the wood has open grains)
- Smoking
- Staining or coloring
- Lacquering options : 10 / 20 / 30 gloss
- Our products come with a square edge, a two sided bevel or a four sided bevel

## **Cost efficient flooring**

Indeed, thanks to the fact that PAR-KY only uses the wood really required to make a beautiful floor, PAR-KY is really competitive price wise. You can have a PAR-KY hardwood floor installed for prices compatible to plastic laminates. All accessories as skirting and moldings are available within the wood veneer concept. The extensive PAR-KY range and possibilities (from commonly available wood species to the very exotic ones) will enable you to up sell your customers.

## The Environmental Spirit – working on a green project

Buildings nowadays consume 40% of the world's total energy resources, 25% of its wood harvest and 16% of its water. Compared to traditional construction, a green built home takes some of this pressure off the environment. In the future, all buildings will be green. This is inevitable. Soon, we will have no choice.

PAR-KY today already offers architects and specifiers all over the world, an **ecological and ethical product**: a veneer hardwood floor.

Wood veneer makes the most efficient use of wood offered by nature. With a net output of about 700 m<sup>2</sup> of veneer per 1 m<sup>3</sup> of wood, there is no other natural product that is capable of offering bigger usage of any natural resource.

PAR-KY also makes all efforts to guarantee that the wood is being sourced from "well managed forests" Offering both FSC and PEFC certified products, is an extra asset. FSC materials are being produced under the chain of custody (SGS-COC-0481) and PEFC materials under the chain of custody (SGS-PEFC/COC-0117).

Next to this PAR-KY possesses the know how to produce its products without adding any formaldehyde. Ask your sales representative about more information. We would like to push these options, again having in mind that in the future all our buildings will need to be "greener"

Note: green for sure does not mean "more expensive"
